ISETIA

Digital Transformation requires holistic approach. That's why ISETIA is not just individual system but ecosystem which on the base of digital documentation, communication and technology supports all processes enabling real digital transformation.

ISETIA is an innovative, flexible and globally trusted project and process management platform which works as Common Data Environment (CDE) and within secured Cloud Computing infrastructure. Helps to plan, manage, execute and report programs, projects and portfolio of projects.

Thanks to process automatizatio leverages efficiency, reduces risk also drives project control as wel as visibility. It's integrated, complex solution supporting multi-level, personalized micro and macro management as well as transparent, digital cooperation in real-time.

Consists from modules: Document Management, 3P Management, Cost Management, Proces Management, Risk Management Issue Management, Change Management, Lessons Learned, BIM Viewer. ISETIA Analytic module is an impressive data processing BI which allows to get and blend data from multiple sources for cross functional reports and dashboards.

Thanks to ISETIA BIM Professional module and BIM Viewer, ISETIA transforms to 4D/5D digital dimension. Offers advanced BIM Workflow, issue and version management, upload and saving IFC files also control of file version as well as Clash Detection.
