ISETIA FOR EGE GRUP

There is no company that would want to waste their valuable time to struggle with altercations neither between project managers nor employees. How would it be to have solution which enforces collaboration? A software which indicates the path to the optimal decisions? Thanks to ISETIA you can allow your selected executive resources fully participate in the decision making process to make sure that the best scenario of action has been agreed. That's the reason why Ege Grup has bent towards ISETIA. That's how our story began.

SMART DECISION

Ege Grup was seeking for software which is not just designed for Agile Project Management but is flexible and at the same time supports traditional Project Management approach. In addition is user-friendly and easily integrates with other solutions which has been already implemented in organization. One of the biggest advantage of ISETIA, which has been critical for Ege Grup,is providing fully integrated project and document management functionality in one platform.

WHY ISETIA ?

Companies which have complex construction projects, have to focus on all kinds of different aspects like costs, risks, administration at the same time. And that's only a tiny fraction of all. They have to act fast that's why often they decides to purchase separate software for each departament as need is araising. ISETIA incorporates all the aspects in one platform and integrates all project stakeholders (Investors, GC, Subcontractors, Designers, Suppliers) in common data environment. It's the only wayto provide transparent data and information sharing while being satisfied with powerful security and privileges.

" We have to be able to multitask, as we're being both investor and contractor. Construction projects requires a lot of administration work such as building permits, designs, utility diversions, environment protection permissions, material selections, tenant negotiations, contract management with utility and services providers, etc. There are not many solutions available in market which provide and support Feasibility-Design-Plan-Control-Operate and Maintenance in the same platform like ISETIA does. In the past we've tried a lot of different ways of maintaining tasks from different fields. Now ISETIA assists us throughout this whole process. We are extremely happy and satisfied by the complexity of product and at the same time simplicity of product's usage." Veysi Ozcan, Architect and Managing Director, Ege Grup

CENTRAL CLOUD PLATFORM

ISETIA helps Ege Grup to manage all their project information on central cloud platform without any expandetures for IT hardware installation, so they wouldn't loose any time and money for dealing with dificulties of installation & operating process as well as building up sophisticated IT enviroment. Moreover it provides a platform for managing portfolios, programmes and multiple projects easily online. So all project participants are working on latest data.

CONSTRUCTION

ISETIA FOR CONSTRUCTION PROJECT

EGE PLAZA

Ege Plaza, which is situated on Konya Road - one of the business world center of Ankara - consists of 33 floors overall. Ege Plaza is included in a particular project which construction area is designed to occupy 70.000 square meters. Volkswagen, Audi and Porsche showrooms and service areas are included.

"It was complicated, expensive and very much time restricted project that's why we needed support of technology which will prevent us from unforeseen risks. While using ISETIA we were not facing any unexpected surprises. We had a chance to know what type of disturbing issue was going on in the project before any serious effects would happen. We were able accurately assign our resources and have an advance warning if they were running out of budget or capacity."
Lut Sungur, VP Member of the Ege Grup Board

WORK DONE **ON TIME**

EGE BOTANIK RESIDENCES

One of the most important goal for a construction company is to complete project on time. All of the Ege Grup projects are run tightly. They needed a solution which would be able to demonstrate the designs and select right construction activities. They've chosen wisely, needless to say it was ISETIA which provides answers to their question such as: Where are we now? When will be all project accomplished? What are the necessary changes? What is next step to be completed? How much is left in our budget? Which issues need to be resolved? What is the possibility of risk impact in my project? What is the most recent version of this document?

MAIDAN

MAIDAN investment was built on 22.435 square meters land and its located around a 6.000 square meters organised in an office, home-office and stores that spread in 4 blocks. Ege Grup used ISETIA to accomplish their goals which are cost-effectiveness, rapid adaptation to the changing customer demands with an easy-to-use interface, visibility increase into project performance etc. ISETIA supports a systematic approach to catching opportunities and improving efficiency so teams can leverage its principles in their everyday work instead of holding back focus on new improvements.

BEST MATCH FOR TEAM EFFECTIVENESS

Every corporation knows that not only they should choose their project teams carefully, but also that the employees themselves need support, privileges and a right equipment to work efficiently. ISETIA helps increasing project team member's performance and reduces time for searching data and information, by providing it straight away.

SEARCHING FOR ISETIA

Construction companies need a master programme to help them dotheir tasks more effectively and in an intelligent way. When we asked Veysi Ozcan, Ege Grup Architect and Managing Director, about searching process, shared his experience:

" We met ISETIA management during PM conferences in Europe. We've always had been planning to implement professional project handling system and we found out that ISETIA has a local partner in Turkey. So we asked them to analyse our needs and see if product can meet our expectations. We've also had searched other technology providers and that reassured us that ISETIA was best for our needs, taking in consideration our budget. We have been using it for over 5 years and we're immensely grateful to see that solution adds value to our firm each year."
