ISETIA CASE STUDY

HARRIS PYE ENGINEERING

WHO IS **HARRIS PYE ?**

Harris Pye is operating worldwide in several sectors like Oil & Gas, Marine and Industrial with philosophy of providing a global services focused on supplying top quality, fast and efficient customer care. Prior to that Harris Pye have over three decades of professional experience in the area of repairs, upgrades and conversions to the marine and associated industrial sectors as well as they achieved over a decade in the offshore oil industry. Harris Pye have a 1,700 global team based in 17 facilities and several offices around the world in such countries like UK, UAE, BRAZIL, JAPAN, CHINA, SINGAPORE, AZERBAIDJAN, USA.

HIGH DEMANDS

It's more than 1 500 ongoing live projects to take care of. Currently Harris Pye is using ISETIA for more than 1 000 projects globally. They have to work concurrently on different projects, as their role is flexible, and it can be as well connected with asset management services and effective delivery of project management also execution throughout the energy and power sector.

COMMON DATA **ENVIROMENT**

A master program plays vital role in helping entire organization starting fromproject members, project managers, project directors as well as contractors and subcontractors.

Especially if the company, like Harris Pye, has such diversity of sectors under supervision. There's no place for delays, mistakes or inconsistency in data. There are many employees workingindependently on different aspects within the same platform, and their software has to assist that diversity in micro & macro scale. ISETIA supports Multi Project & Multi Location environment with unlimited data and documents.

"ISETIA helps us with its excellent qualifications such as easy access which allows to act dynamicallly, flexible structure with comfortablefiling system and many other " Danut Cimpoaie, Senior Document Controller, Harris Pye

SECURED DATA

It's critical to ensure security of documentation. There's always a range of important, highly protected data with restricted access. Some of papers should be evaluable only for certain group of employees because of file exclusiveness. With ISETIA you can easily operate document flow, without any risks. Based on scalable privileges access there is full guarantee that only those with permeation will enter information. Danut Cimpoaie, Senior Document Controller at Harris Pye underlains "The main benefit of this software is the restricted access it gives to the documentation, as it's running properly with our structures such as quality 9001 standards. That is related to our company profile and it needs to be included on integrated management system."

HARRIS PYE ENGINEERING

WHY **ISETIA ?**

Danut Cimpoaie is an experienced Senior Document Controller at Harris Pye, with over 20 years of expertise in Document Control and Service Engineering. As a professional responsible for managing documentation without wasting time, effort and costs, he aimed to find the most appropriate software for his company which will support entire organization. One that would be applicable for their sophisticated procedures, user-friendly and functional. He analyzed market very well, while researching for their master software, and decided to go for ISETIA. It's because solution seemed to be tailored for every needed feature.

A master program plays vital role in helping which he expected. It not only allows to apply strong workflow process but also supports document management area such as search for documents in a short time: by name, by category or by content; place instant visual comment by markup option which gives ability to make notes directly on document but most of all guarantees transparentdocuments flow and revision as well as automated archivization. "Ourprofile company looked for DMS System and particularly ISETIA just has all these details. I choose ISETIA instead of any other solution because it was easy and applicable for our procedures."

3P **MODULE**

"We generally operate in locations where integrate connections are not very good but we were positively surprised that we could use ISETIA with high performance. We choose the option to combine ISETIA with our own IT corporate. We have trained our team onsite as well as with just a few days of training program online, which was very helpful. Considering multi users, multi culture challenge and in addition thousand of documents and projects with great support from ISETIA Team we were able to manage implementation within a short amount of time".

Danut Cimpoaie, Senior Document Controller, Harris Pye

"Portfolio, Program and Project Managements were the most demanding for us.We conduct projects in Dubai, India, Brazil, Hong Kong, Singapore, Europe, and many more. We suffer from different time zones and it is not really easy to keepdocumentation in one place with 24 hours support. ISETIA gives us flexibility and with high security allows operational work on documents and information online."

Danut Cimpoaie, Senior Document Controller, Harris Pye
